LIFESTYLE APPROACH TO
HEALTHY LIVING.**

INTRODUCING REGENR8'S EPIGENETIC BIOMARKER PROFILE™

What are you missing by not getting tested today?

WOULDN'T IT BE GREAT TO KNOW?

Wouldn't it be great to know which vitamins you may be missing? Which nutrients you could easily incorporate into your diet? Which supplements you can add to your daily routine?

There are so many choices and not enough information to make a choice that fits each person as an individual. If this wasn't challenging enough, how do we decide if the choices we're making are making a difference in our overall health? We can't ignore the time and cost involved in the trial and error of making seemingly good, albeit "blind", choices in the pursuit of optimal health so it would be great to know what works for each person individually and even greater if it were simple.

REGENR8: EPIGENETIC BIOMARKER PROFILE™

Regenr8's Epigenetic Biomarker Profile™ was designed to remove the blinders in these choices and help people pursue optimal health in an intentional and informative way. The science behind the Epigenetic Biomarker Profile™ is complex, but the actionable steps provided in the result-driven report are as easy as 1,2,3! All you need to do is;

1. Collect a single urine sample and return it to the lab.
2. Receive a comprehensive report listing supplements, foods and lifestyle choices that will improve areas of weakness (see areas of assessment below).
3. Add recommended interventions to your daily routine and retest to monitor/adjust levels until balance and maintenance is achieved.

AREAS OF ASSESSMENT

The Epigenetic Biomarker Profile™ creates a personalized approach to optimal health through examining certain biomarkers of genetics, diet, lifestyle, environment, metabolism and detoxification to make assessments in the following areas;

- Cellular Energy Production
- B-Vitamin and Methylation
- Inflammation and Oxidative Stress
- Muscle Assessment
- Gut Assessment
- Essential and Non-Essential Amino Acids

KNOWLEDGE IS POWER

Regenr8 combines the power of epigenetic expression markers with metabolomics to deliver the next level of personalized wellness and precision medicine. Ask your doctor about the Epigenetic Biomarker Profile™ today.
