

## Healthcare Pro Practice Workflow

1. Patient completes Genetic Expression Assessment form in waiting room
2. Provider reviews Assessment with patient in exam room
3. Give tablet to patient with Virtual Wellness Assistant to review benefits of Epigenetics, RFP and Testimonials
4. Provider writes script for Analyze, possibly RFP
5. Hair test performed by MA, card completed and expressed mailed to processing center
6. Clinic designated Regenr8 Program Manager registers patient at [www.Regenr8.pro](http://www.Regenr8.pro) in Provider's back office (see patient registration step by step)
7. Process Analyze patient order at checkout and schedule follow up appointment 1-week out to review results with provider.
8. At follow up appointment provider reviews the Custom Regenerative Nutritional Report with patient
9. Provider recommends Optim8 Epigenetic Custom Superfood regimen
10. Clinic Regenr8 Program Manager assist patient with logging in to their account to set up automatic ship (next ship date):
  - 2 weeks from today's date if purchased Analyze kit
  - 6 weeks from today's date if purchased Custom Balance or Kick Star
11. Schedule Three Month Follow-Up to Repeat Analyze Signature Map
